

BASKETBALL HOOP INSTALLATION – PURCHASERS GUIDE

The following is an example for overhang measurements, you must ask your sales person what your overhang is.

	Lowest Position 6'	Middle Position (Straight Out) 8'	Highest Position 10'
 <p>Goalrilla CV54 Goalrilla CV60 Goalrilla CV72 Pro Dunk Diamond</p>	73.5"	70"	31.5" 31" 45" 60"
Diamond 72" Pro Dunk Platinum 72"	65"	66"	72" 48"
Pro Dunk Gold 60"	65"	66"	48"
Pro Dunk Silver 54"	53"	54"	36"

These overhang measurements are from the front of the pole to the front of the backboard. When planning placement of your hoop, these measurements must be taken into consideration.

- When the install team arrives, they will need to be directed to the site for the installation. As there are sometimes preferences in overhang, they will need to verify the exact placement of the hoop. Therefore, a responsible adult must be present. **If there is not a responsible adult present, we will have to reschedule your installation and charge you a \$200.00 return Fee.**
- Tree branches or other items in the way of installing your hoop **MUST** be removed **BEFORE** installation begins and are the responsibility of the homeowner. The install team will **NOT** remove branches or other obstructions. **If these items are not removed before the install team arrives, we will have to reschedule your installation and charge you a \$200.00 return Fee.**
- The hoop base will be buried up to 4' and must be a minimum of 6" from the edge of the concrete pad. The install team is not responsible for buried lines or utilities when digging to install this base.
- **YOU MUST CALL DIG SAFE, IT'S THE LAW AND ITS FREE.** If you have a concern, you must provide plans to identify any buried lines or utilities where the hoop is to be installed. **Contact with buried lines or sprinkler heads becomes the responsibility of the homeowner to resolve.** The install team does not move sprinklers.
- For in-pad installation, a minimum of 12" is required from the edge of the concrete pad to the closest bolt. In-pad installation also requires a minimum pad thickness of 6" in a 5'x 8' area where the hoop will be placed.
- The install team follows a tight schedule and does not have time to wait while unfinished preparations are taken care of. **If the area is not prepared before the install team arrives, we will have to reschedule your installation and charge you a \$200.00 return Fee.**
- When the install team completes the hoop, you should check it over and look for anything that does not meet your satisfaction. Point out anything that you notice to the install team, so they can fix it or make arrangements to fix it. If parts are missing for the installation and we have to return, the homeowner is responsible to order the parts and pay a return fee.
- **When the install team is done, any remaining balance must be settled with the install team unless prior arrangements have been made.**
 - Only includes digging into the earth, **NOT** cutting into asphalt or concrete, that is an extra charge. We will need an area for dumping earth from your basketball hole and a place to clean out our equipment from mixing concrete on your property. **NOTE:** (Removing earth off your property is an extra charge of \$125.00)
 - **NOTE:** If you have the hoop installed into gravel, there are extra charges and your install team needs to know before we arrive, we will need to build a wood form and extra charges will apply.
 - **NOTE:** Hard digging (Packed gravel or rock that requires us to use our jackhammer/hammer drill or long bar is an extra charge of \$75.00 per hr. (one hr. min)
 - **NOTE:** Installing accessories is an extra charge. Example: Yard Guard \$100, LED light \$100.
 - If we hit rock or ledge/pinning down: Drill holes in the hard surface with a hammer drill, clean out holes, install rebar with high strength fast setting anchoring adhesive. Material \$60.00 Labor \$235.00.

I have read and understand the terms of this purchaser's guide. By signing below, I acknowledge that Versacor Enterprises Inc. will perform the agreed-upon installation according to the terms above.

Signature: _____ Date: _____

Backyard Adventures has completed the installation of my Basketball Hoop, and I am satisfied with the placement of the installation. If I request that Versacor Enterprises Inc. return to make adjustments to the placement or position of my Basketball Hoop at a later date, additional installation charges will apply.

Signature: _____ Date: _____

*** If you will not be present during all of the installation or at the completion of your installation, you must agree to the following:**

I am requesting that Versacor Enterprises Inc. install my Basketball Hoop even though I will not be present during all of the installation or at the completion of the installation process. I understand that I do not have control over the exact placement of my Basketball Hoop and that Versacor Enterprises Inc. will use their best judgment in following the directions I have given them regarding the installation of my Basketball Hoop. I understand that Versacor Enterprises Inc. will not return to make adjustments to the placement or position of my Basketball Hoop once the installation has been completed. If I request that Versacor Enterprises Inc. return to make adjustments to the placement or position of my Basketball Hoop at a later date, additional installation charges will apply.
